THE NEW BUILDINGS

No action has been taken as yet to secure federal work relief funds for new buildings, as the World-Herald recently suggested, we are sorry to report. We were in hopes that the Regents would by this time have taken active steps to secure an allotment of federal work relief funds for new buildings which the University so sorely needs.

Several million dollars are to be spent in Nebraska for work relief. Grade crossings are to be eliminated, highways and bridges are to be built, public buildings are to be erected, and a host of other useful public works similar to the proposed University buildings will be carried out with these funds.

The proposed Municipal University building program is certainly a desirable project. Enlarged educational facilities for the youth of Omaha and adjoining territory will be offered. The project would give employment to several hundred Omaha workingmen. There would be no additional burden on Omaha taxpayers. A short study of the facts will readily convince one of the desirability of the project.

We are disappointed, we must confess, that the Regents have not seen fit to ask for an allotment of work relief funds for the new buildings. We hope that the Regents will in the immediate future see fit to take the proposed action of the World-Herald. Certainly the benefits that will flow from the project will many times repay the initial effort made to secure the funds.

REMOVING THE ICE HOUSE

THE removal of the ice station from the campus to another point in the city shows what a little concerted action can accomplish. The Covenant Hospital, the University faculty, and The Gateway all took action to secure the removal of the station.

Some cynical observer might pop up and say that the reason the station was removed was that it was not paying. We really believe, however, that the opposition expressed by the faculty, hospital, and The Gateway was the main factor in causing the removal of this eyesore from the campus.

All of this hazards us to prophesy that if all the groups in Omaha that are desirous of seeing Omaha University secure new buildings would join forces and exert a concerted pressure the building proposal might be carried out. At least, we venture to say, if the above suggestion was carried out we might know why no effective action had been taken to secure PWA funds for new buildings when it was possible to do so early in 1933.

EXAMS FOR SENIORS

THE practice of giving seniors examinations from one to two weeks earlier than the remainder of the student body creates a great deal of confusion and virtually breaks up class work for the rest of the semester. At many other universities, we understand, instructors turn in a preliminary estimate of the senior's grade and the giving of final examinations in advance is eliminated.

The registrar, in making up diplomas, is guided by this preliminary list. Diplomas are not made out for those who are on the doubtful list. Instructors are, in most cases, able to give a preliminary estimate of one's grade which will vary little, if at all, from the final grade. Why can't this method be followed at Omaha University? It would eliminate a great deal of confusion and would prevent the breaking up of the last two weeks of the spring semester.

In view of the number of anonymous publications that have been distributed on the campus recently, it might be well to set up a Board of Anonymous Publications.

Professors and Examinations

By FRAN NELSON

In the good old springtime a professor's thoughts turn "Bock" from wherever a professor's thoughts go. (Assuming that professors have thoughts.) They stifle their yawns, throw their feet carelessly under the desk, and begin wondering how to show up that bunch of halfwits in their advanced class. (It's really the same class and subject they gave them last semester, but they threw out the textbook this semester and substituted a few lectures of their own. This has saved them a lot of work and even if the class did find out they probably wouldn't care much.)

Some of the pros are pretty peeved. (I don't care for the word piqued.) Some of them spend a whole hour or two preparing beautiful little lectures with jokes written in on the margin, pauses for laughing, etc., and in the midst of their general libations poured down the neck and over the dirty feet of the goddess of education, Panic, they look out into a dead sea of blank expressions and dull, sleepy eyes. It is depressing, to say the least. What can he do to wake the boobs up?

"Ah! I have it—start telling them about that exam. Make them think it's going to be a bally beaver. Fool 'em, too....make it twice as bad."

With such thoughts as these to soothe his wounded pride, he starts in spreading the propaganda. First come subtle suggestions, gentle hints and urgings, then intimations, and at last downright intimidations, such as sneaking up to the bulletin board and posting schedules and other trifles which are supposed to put the fear of God and our professors in the very marrow of our bones.

By this time the library staff is powdering its nose, straightening its necktie and giving other signs of awaking from a long winter sleep. After all, the library must do something to deserve this sudden popularity.

And then the week of woe comes. There is a hush—a stillness around the campus that reminds us of all the weeks that have gone before. (Before what?) And what happens? The same old thing that's been happening all these years. The students take the exams, the professors give them and the FERA students correct them and put in their applications for next year.

So you see, my little onion roots, nothing happens after all and this is all so futile. If "futile" forgive me, I guess I'll go now.

Thru The Keyhole

Well, here is the last of the "dirt" you'll read about for many a day....It's sorta sad to be writing my last edition of this most infamous column, but probably a boon to those on whom I have "picked"....I really didn't mean to hurt anyone, though, not even my best girl....If I could find one....May I say once and for all that I am hoping I caused no ill feelings and we can all be good friends again....I know this is true in a majority of the cases, but there are a few feelings I will have a hard time repairing....I take it all back....the cigarette contest was on the up-and-up, the wrapper being counted by a Beta, a Theta and a Barb....Beings my school days are about over, I want to dish out my hopes for those who are struggling for popularity, as we all do so hard.

COUNCIL BLUFFS GALS

I guess I'll pick on Ruth Saalfeld first and tell her that I hope she falls in love with some Romeo who will be nice to her and vice versa....and then I hope Donlon will come out of the heap with a smile....I hope they soon will have a free bridge to the Bluffs, and if they do just think of all the more nice gals who will be coming over here for their education....and those that are here now will come back....I hope the Alpha Sigs will take in some more nice boys and the Phi Sigs some more bad boys and then I don't know what will be left for the Theta's....and then I hope Norelius will calm down and be a good boy for a change....And then all will be glad to be rid of the Christensen menace and the Butler conceit and a lot of other things....and then I hope they will not have a red-headed correspondent, because those that know the dirt will not tell it to him because it seems that the present one has a devil of a time trying to get into the confidence of notorious people.

I suppose that all you that have the means will take a little jaunt this summer....Rogers, Leigh, Moucka and myself will try to get out to Bryce Canyon and Glacier Park if Rogers' flier will do it....So here's a final adios, farewell, buenas noches and what have you, and may the seniors have a great day today and trample on a few freshmen, and may we all meet again some day in a spacious new memorial hall and remember the days when they had an ice house on the corner of the campus....s'long.

Uni. Scholarships Open To Students

Each year Omaha University awards a number of scholarships to university students and Omaha high school graduates. As yet the scholarship committee has not met to award these, as it is awaiting word from the national government concerning the FERA funds. Two scholarships will be given to Central, South and Technical High schools and one each to Benson and North. These are awarded by the Board of Regents and are for four years.

There are twenty scholarships awarded to worthy junior and senior students in the University by the Board of Regents. In addition to these scholarships the income from the following funds provides scholarships each semester: Mary Stoddard scholarship, Dr. S. K. Spalding scholarship, Colonial Dames Americanization scholarship, Joseph Barker, Sr. scholarship, Ware scholarship, Webster Student Loan Fund, Hannah E. Black scholarship, and the C. W.
